

0308 Safety Guidance

Using the Circular Saw

- Wear your protective equipment including ear defenders and goggles.
- Make sure the dust collection system (if fitted) is connected and working.
- Always hold the saw firmly with two hands when working.
- To prevent damage to your blade, check that there are no nails, screws or metal embedded in your work piece.
- Let the saw run up to speed before applying it to the work piece.
- Let the blade stop completely before withdrawing it from the work piece.
- Stop the machine and remove the plug before making any adjustments. 7.
- Keep the cable clear of the blade and any sharp edges on your work.
- If you think the cable may be cut or damaged in any way, switch off and unplug at the mains before inspecting it. If the cable attached to the circular saw is damaged, stop using the machine. Contact the hire company. If an extension cable has been damaged, do not use it again.
- 10. Take care not to accidentally pull the plug from the socket.
- 11. Switch off and remove the plug from the socket before leaving the circular saw
- 12. If your equipment does not work properly do not attempt to repair it. Contact the hire company
- 13. You may want to read this leaflet again. Please keep it until you finish work.

Circular Saw

The rules and procedures in force where people are at work may require the person responsible for this equipment to carry out a specific risk assessment.

It is important to read all of this leaflet **BEFORE** you use the Circular Saw

- Electricity is dangerous and must always be used with great
- This circular saw is designed to cut wood, chipboard, mdf and similar materials using the appropriate blade. It is not designed for any other purpose. Do not use it for cutting anything that may contain asbestos.
- The abrasive wheel rotates very fast and can cause injury or damage if the machine is not used in a careful and controlled way.
- If you have not used a circular saw before, familiarise yourself with the machine on some straightforward work before you start on the main task
- Plan your work and think ahead to make sure you will always be working safely.
- You must have at least the following items of personal protective equipment: goggles: EN166 or BS2092; dust mask - a minimum of EN149 FFP3(s) protection; Safety boots to EN345 or BS1870/4972; industrial quality gloves; residual-current device (RCD) if using a 230 volt (mains) supply.
- A personal first-aid kit should be available.
- This circular saw must not be used by minors, or by anyone under the influence of drugs
- This circular saw is designed for operation by an able bodied adult. Anyone with either temporary or permanent disability must seek expert advice before using it.
- Although circular saws are designed for one person operation you should always be careful you do not lift beyond your own capabilities
