- 4. To help prevent vibration affecting hands, operate the machine for shorter periods. Keep hands warm - wearing gloves may help do this.
- Always start each operation with the breaker at right angles to the work surface to 5. prevent the tool skating across the surface to be broken.

Using the Hydraulic Breaker

Do not operate the breaker until the tool is on the work surface. Do not operate the

Wear protective equipment including ear defenders and safety boots.

- Do not use the breaker as a lever to prise open the work area. 6.
- Do not try to lever free a tool jammed in the work surface. Instead release the tool 7. from the breaker and insert another one. Use this second tool to break up the ground and free the first tool.
- 8 Keep the hydraulic hoses clear of the work area.
- Do not stretch the hoses as the work area expands, move the power pack. 9.
- 10. Do not drag the power pack by pulling on the hoses.
- 11. If a hose appears to be damaged or is leaking, stop work, stop the engine and release the pressure by moving the flow control lever to minimum and squeezing the trigger on the breaker.
- 12. On solid concrete areas use a point. Start near the edges and work to a pattern.
- **13.** Stop the engine before leaving the equipment unattended.
- 14. If the equipment appears to be faulty or does not work properly do not attempt to repair it. Contact the hire company.

# **Hydraulic Breaker**

The rules and procedures in force where people are at work may require the person responsible for this equipment to carry out a specific risk assessment.

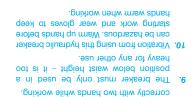

#### It is important to read all of this leaflet **BEFORE** you use the Hydraulic Breaker

- 1. Petrol is highly flammable. Take care not to cause a fire or explosion.
- 2. Plan work and think ahead to ensure work is carried out safely.
- The hydraulic breaker is designed for breaking concrete, 3. stone, tarmac and similar surfaces.
- 4. If you have not used a hydraulic breaker before, familiarise yourself with the machine on some straightforward work before commencing on the main task.
- The following items of personal protective equipment (PPE) are the minimum that is required: goggles - impact resistant; ear muffs or plugs giving protection at the ear for levels up to 80 dB(A); safety boots; gloves.
- This machine must not be used by minors or by anyone under the influence of
- drugs or alcohol. 7. The hydraulic breaker is designed for operation by an able bodied adult. Anyone with either temporary or permanent disability must seek expert advice before using
