

Using the Tile Lifter

- Wear your personal protective equipment including ear defenders, goggles, protective footwear and gloves.
- Extra caution must be exercised with stiff flooring and aggressive adhesives as they may cause the tile lifter to move sideways.
- Keep the cable clear of the cutting blades of the machine.
- Watch out for signs that vibration may be affecting your hands. If your fingers start to tingle or feel numb, take a short break from using the machine. Exercise your fingers to encourage blood circulation.
- To reduce the risk of vibration affecting your hands, operate the machine for shorter periods. Keep your hands warm: wearing gloves may help do this.
- Should the machine vibrate excessively is must be returned to the hire company.
- If you think the cable may be cut or damaged in any way, switch off and unplug at the mains before inspecting it. If the cable or extension lead attached to the tile lifter is damaged, stop using the machine and contact the hire company.
- Take care not to accidentally remove the plug from the socket
- Switch off and remove the plug from the socket before leaving the Tile lifter
- If your equipment does not work properly do not attempt to repair it. Contact the hire company.
- 11. You may want to read this leaflet again. Please keep it until you finish work.
