

Using the Equipment

1. If you think a cable may be cut or damaged in any way, switch off and unplug at the mains before inspecting it. If the cable attached to the machine is damaged, stop using the machine. Contact the hire company. If an extension cable has been damaged, do not use it again.
2. Take care not to accidentally pull the plug from the socket.
3. Switch off and unplug before leaving the machine unattended.
4. If your equipment does not work properly, do not attempt to repair it. Contact the hire company.

Please keep this leaflet safely as it may be required for future reference

Cable Reels and Distribution Boxes

The rules and procedures in force where people are at work may require the person responsible for this equipment to carry out a specific risk assessment.

It is important to read this entire leaflet BEFORE using the Cable Reels and Distribution Boxes

1. Plan your work and think ahead to make sure you will always be working safely.
2. Electricity is hazardous and must always be used with great care.
3. Cable reels and distribution boxes are designed to supply the electricity safely up to their rated current.
4. If you have not used this type of equipment before, familiarise yourself with the cables, plugs and sockets before connection to the electricity supply.
5. You must have at least the following items of personal protective equipment: RCD if using a 230 volt (mains) supply.
6. Particular items of equipment or environments may require a higher level of personal protective equipment.
7. Electrical equipment must not be used by minors, or by anyone under the influence of drugs or alcohol.
8. Electrical equipment is designed for operation by an able bodied adult. Anyone with either temporary or permanent disability must seek expert advice before using it.

1. Use a residual current device ("rcd") plugged directly in to the 230 volt socket. Plug your machine into the rcd. This will help to protect you against electric shock if the cable or machine get damaged.
2. Use the "TEST" button to check that the rcd is working each time you use instructions supplied with it.
3. If you need to use an extension cable, follow any special instructions given by the hire company. If the hire company have not given any special instructions, you should only use a suitable rated heavy duty cable, not longer than 50 metres (160 feet). Plug it directly into the rcd.
4. Lay it out carefully avoiding liquids, sharp edges, doorways or windows where it might be trapped, and places where it might be trapped, and places where it might be trapped, and places where it might be trapped.
5. Make sure that any extension cable connections are dry and safe.

5. Make sure that any extension cable connections are dry and safe.

1. If you are using a portable transformer, plug the transformer directly into the 230 volt socket. Do not use any extension cables.
2. If you need to use an extension cable, follow any special instructions given by the hire company. If the hire company have not given any special instructions, you should only use a suitable rated heavy duty cable, not longer than 50 metres (160 feet). You must only use an extension cable between the transformer and the machine.
3. Lay the extension cable out carefully avoiding liquids, sharp edges, doorways or windows where it might be trapped, and places where it might be trapped, and places where it might be trapped, and places where it might be trapped.
4. Lay it out carefully avoiding liquids, sharp edges, doorways or windows where it might be trapped, and places where it might be trapped, and places where it might be trapped, and places where it might be trapped.
5. Make sure that any extension cable connections are dry and safe.

1. Do not use electrical equipment where there is danger of explosion. It will ignite fumes from petrol or gas cylinders.
2. Make sure that the area is clear and safe and that no-one is near to you or could distract you.
3. Protect other people from any noise and dust your work may produce. Warn others to keep away, put barriers around your work area.
4. Keep electrical equipment away from rain and water.
5. The following items of personal protective equipment (ppe) are the minimum that should be used whenever you use electrical equipment. Particular jobs or environments may require a higher level of protection.
6. An rcd if using a 230v (mains) supply. You will also need to wear appropriate personal protective equipment.
7. Check your equipment, cables, plugs and sockets. If anything is found damaged, do not use it – contact the hire company.
8. Check that the plugs and sockets on your cables and distribution boxes operate – before you switch on/off switch.
9. Check on how the on/off switch operates – before you switch on/off switch.
10. Check on how the on/off switch operates – before you switch on/off switch.
